this book presents a new technology first developed in japan by sato for
improving existing products and creating new and better products it combines
traditional tear down with the technologies of value analysis and value
engineering

written by leading market risk academic professor carol alexander value at risk
models forms part four of the market risk analysis four volume set building on
the three previous volumes this book provides by far the most comprehensive
rigorous and detailed treatment of market var models it rests on the basic
knowledge of financial mathematics and statistics gained from volume i of factor
models principal component analysis statistical models of volatility and
correlation and copulas from volume ii and from volume iii knowledge of pricing
and hedging financial instruments and of mapping portfolios of similar
instruments to risk factors a unifying characteristic of the series is the
pedagogical approach to practical examples that are relevant to market risk
analysis in practice all together the market risk analysis four volume set
illustrates virtually every concept or formula with a practical numerical example
or a longer empirical case study across all four volumes there are approximately
300 numerical and empirical examples 400 graphs and figures and 30 case
studies many of which are contained in interactive excel spreadsheets available
from the the accompanying cd rom empirical examples and case studies specific
to this volume include parametric linear value at risk var models normal student

t and normal mixture and their expected tail loss etl new formulae for var based on autocorrelated returns historical simulation var models how to scale historical var and volatility adjusted historical var monte carlo simulation var models based on multivariate normal and student t distributions and based on copulas examples and case studies of numerous applications to interest rate sensitive equity commodity and international portfolios decomposition of systematic var of large portfolios into standard alone and marginal var components backtesting and the assessment of risk model risk hypothetical factor push and historical stress tests and stress testing based on var and etl

illustrated by case studies from europe north america and the middle east this book examines how non market values can be identified measured and incorporated into planning evaluation methodologies the traditional means of assessing planning options benefit cost analysis requires that all effects be expressed in monetary terms and this volume offers alternative approaches it presents strategies for accomplishing the major purposes of planning evaluation including the provision of an explicit replicable basis for public assessment in alternative ways growing demand for public involvement and for accountability in decision making requires better means for accommodating a broad range of concerns in planning evaluation methodologies examined include effectiveness cost and multicriteria analysis and the book explores how these have been applied in practice in developing special issue plans complex regional development strategies and efforts to analyze the environmental justice implications of major infrastructure projects use of scenarios and problem structuring methods by stakeholder groups are also explored

how should an investor challenge the market price and find value this book provides a new lens arguing that value investing is a matter of understanding the business through accounting stephen penman and peter f pope leading authorities on accounting and its investment applications demonstrate why attention to financial statements is the key to judicious valuation more broadly they show that accounting fundamentals when analyzed in a systematic manner teach us how to think about value in new ways this guide to investing through analysis of financial statements presents both underlying principles and practical examples it examines how an accounting book is structured the ways to read one in order to extract information about value and why accounting techniques
