this entertaining volume reveals some of the grossest practices in hygiene dining fashion and medicine of medieval europe serfs often smelled bad and they bathed and relieved themselves in streams filled with garbage wealthier individuals who had bathrooms produced waste that was sent down chutes into the castle moat peasants and nobles commonly consumed animal parts that today we would consider less appetizing including paws brains stomachs and lungs poor nutrition resulted in rotting teeth and scurvy doctors were woefully backward in treating patients using odd remedies such as ground up worms bloodletting through leeches and spreading animal dung on wounds

while most people today take hygiene and medicine for granted they both have had their own history we can gain deep insights into the pre modern world by studying its health care system its approaches to medicine and concept of hygiene already the early middle ages witnessed great interest in bathing hot and cold swimming and good personal hygiene medical activities grew over time but even early medieval monks were already great experts in treating the sick the contributions examine literary medical historical texts and images and probe the information we can

glean from them the interdisciplinary approach of this volume makes it possible to view this large field in a complex and diversified manner taking into account both early medieval and early modern treatises on medicine water bathing and health such a cultural historical perspective creates a most valuable bridge connecting literary and scientific documents under the umbrella of the history of mentality and history of everyday life the volume does not aim at idealizing the past but it definitely intends to deconstruct modern myths about the dirty and unhealthy middle ages and early modern age
