contact between islam and the west is 1400 years old both sides have had more than
adequate time to become familiar with the other yet the world is still arguing about islam
s teachings is islam peaceful does it commend violence does islam respect the other does
islam abuse women is islam anti semitic does islam teach the torment of the grave does
islam recommend the beating of wives do muslim scriptures commend temporary marriage of
pleasure did zayd divorce zaynab because he had no further need of her all these questions
are easy to settle for anyone who can read islamic scripture in arabic the author of this
book is such a person however to answer all these questions in the affirmative would do
the image of islam much damage in the west where islam is keen to present a polished image
especially in the light of much violence committed in its name against westerners muslim
leaders and their allies in the west have popularised a distinction between muslims and
islamists in order to distance islam from thousands of heinous muslim crimes such as the
charlie hebdo massacre are the english translations of the qur an faithful to the original
arabic or are they part of the charm offensive muslim petro dollars have financed for
years through sponsorship of university departments of islamic studies investing in
western media and publishing building islamic centres and financing islamic societies and
pressure groups throughout the west this work gives english readers the ability to access
the original arabic of the qur an and hadith and see the true face of islam without its
face powder it is hoped that this work will assist free thinkers to form their own opinion
of islam based on the true qur an without interference from muslim propaganda or any
agenda driven discourses

did you know the moon is considered a natural satellite or that its gravity affects ocean
tides on earth this book explores the closest celestial body to earth and the ways in

which the moon and earth affect each other chapters introduce topics including the moon s origin its makeup and phases the first people to walk on its surface and the moon s role in both lunar and solar eclipses planets and stars moons and galaxies the universe is a vast and mysterious place with much to explore and there s no better way to make amazing discoveries about space than with this reimagined series with the latest nasa imagery the classic structure and features of a true book and lively text the titles in our universe bring the awe of the cosmos directly to readers students will come away with a wealth of knowledge about the incredible celestial bodies in our universe this series covers next generation science standards core ideas including the universe and its stars and earth and the solar system
