contemporary urbanisation has two faces global flows of people money and information and that of localised social and economic disparities recent research has focused on the headlines of global cities as control centres of the world economy and social and economic shock waves that have raged through cities and regions but less attention has been paid to the secret life of cities and the changing nature of everyday life in the wake of such changes this book challenges current research and policy agendas recommending spatial concentration and relocation as a solution to the problems of environmental sustainability and social dislocation instead this book highlights the key linkages between social and environmental problems it argues that neither are likely to be resolved with a simple spatial fix the book draws attention to local contexts of contemporary urbanisation emphasising consideration of policy making from the perspective of the household as a key unit of analysis in identifying links between labour and housing markets transport and leisure this book draws upon detailed household interviews about the daily experience of life in a global city it illustrates the dilemmas and

solutions that people routinely find in order to go on in their lives it shows that these local fixes that are managed at the level of the household work in spite of and sometimes against existing policies aimed at sustainability it concludes that policy making needs to be radically overhauled in order to address the integrated nature of people's everyday lives
