provides engaging reading and references on environmental translation and communication to a wide audience across academia

flins originally an acronym for fuzzy logic and intelligent technologies in nuclear science is now extended to computational intelligence for applied research the contributions to the ninth in the series of flins conferences cover state of the art research development and technology for computational intelligence systems both from foundations and applications points of view

this impressive collection of original essays explores the relationship between social conflict and the environment a topic that has received little attention within criminology the chapters provide a systematic and comprehensive introduction and overview of conflict situations stemming from human exploitation of environments as well as the impact of social conflicts on the wellbeing and health of specific species and ecosystems largely informed by green criminology perspectives the chapters in the book are intended to stimulate new understandings of the relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world with a goal of creating a typology of environment social conflict relationships useful for green criminological research this study is essential reading for scholars and academics in criminology as well as those interested in crime law and justice

people want to live a healthy and happy later life a large body of literature shows the close association between health status and happiness and between health and active engagement in work exercise and social and religious activities however the causation between the two can run both ways and it is difficult to determine the causal effect with cross sectional data various authors have shown the significant influence of socioeconomic factors and human needs on older people s health status and happiness a better understanding of the factors affecting healthy and happy aging is essential for policymaking to improve the well being of older people the availability of data from hrs family studies in several asian countries charls in china lasi in india jstar in japan klosa in korea ifls in indonesia hart in thailand mars in malaysia and longitudinal study of ageing and health in viet nam see gateway to global aging data provides an excellent opportunity for researchers to examine factors affecting health and happiness among older adults within and across asian countries this research topic aims to gather papers that investigate the socioeconomic attitudinal and behavioural factors affecting the

health status and happiness life satisfaction of older adults in asia the dependent variables may include physical health mental health disability adl iadl cognitive functioning self rated health health expenditure feeling of happiness and life satisfaction the independent variables may be age gender marital status place of residence educational level active engagement work exercise social and religious activities family and social relationship and support outlook in life smoking drinking and access to and utilization of healthcare services etc manuscripts can be based on individual countries or cross country analysis preferably using the panel data to establish the causal effects of the independent variables on the dependent variables

offers insights into the planning design and management of sustainable and healthy environments the planning design and management of sustainable and healthy environments are the key themes addressed in the papers in this book selected from the iaps 19 conference held in alexandria egypt

environmental history has traditionally told the story of man and nature scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender seeing nature through gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women s actions desires and choices have shaped the world and seeing men as gendered actors as well in thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world virginia scharff and her coauthors explore interactions between gender and environment in history ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes they also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms here are considerations of the ways we study sexuality among birds of william byrd s masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities some are playful as in a piece on the evolution of snow bunnies to shred

betties others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out aiding and adding significantly to the enterprise of environmental history seeing nature through gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we ve engraved on ourselves and on the planet
