coyne s knowledge of evolutionary biology is prodigious his deployment of it as masterful as his touch is light richard dawkins in the current debate about creationism and intelligent design there is an element of the controversy that is rarely mentioned the evidence yet the proof of evolution by natural selection is vast varied and magnificent in this succinct and accessible summary of the facts supporting the theory of natural selection jerry a coyne dispels common misunderstandings and fears about evolution and clearly confirms the scientific truth that supports this amazing process of change weaving together the many threads of modern work in genetics paleontology geology molecular biology and anatomy that demonstrate the

indelible stamp of the processes first proposed by darwin why evolution is true does not aim to prove creationism wrong rather by using irrefutable evidence it sets out to prove evolution right

human physique and behaviour has been shaped by the pressures of natural selection this is received wisdom in all scientifically informed circles currently the topic of crime is rarely touched upon in textbooks on evolution and the topic of evolution rarely even mentioned in criminology textbooks this book for the first time explores how an evolution informed criminology has clear implications for enhancing our understanding of the criminal law crime and criminal behaviour this book is directed more towards students of criminology than students of evolution it is suggested that there is scope for more collaborative work with criminologists and crime scientists exposed to darwinian thought having much to gain what is suggested is simply that such thinking provides a fresh perspective if that perspective yields only a fraction of the understanding when applied to crime as it has elsewhere in science the effort will have been worthwhile the authors attempt to provide a modest appraisal of the potential contribution that a more welcoming approach to the evolutionary perspective would make to criminology both theoretically by expanding understanding of the complexity of the origins of behaviour labelled criminal and practically where the evolutionary approach can be utilised to inform crime control policy and practice an evolutionary lens is applied to diverse criminological topics such as the origins of criminal law female crime violence and environmental factors involved in crime causation

there is more to the human origins development intelligence and civilization than the epic debate creationism versus evolution simply because there is more to the human condition than what authorities and ideologies want you to believe therefore when you study the human origins you have to search beyond the moment when the first humans had detached from the firmament or previous species since there are other significant events in humanity s lifespan and achievement defining its specific timeline while you have to study everything otherwise you risk understanding these significant events only from simplistic empirical or ideological perspectives ending up learning what you already know while following the crowd throughout unending debates since you want the accurate truth because you already know all theories beliefs speculations and debates regarding the human origins and this is why when you study the human origins you expect to understand everything about the origins of life the nature and origins of this world the nature of the human higher self and intelligence the origins and debut of the human consciousness and human intelligent reasoning along with all details related to the creator of this entire world of life and of humanity additionally it is relevant to know how all these affect you personally and how they affect your family your genetic line and your nation how your family and genetic line originate where and how it happened under what circumstances and with

what status and privileges for you for your family for your nation and for the humankind and this is exactly what we cover throughout this book in all details and from all perspectives this book studies the human origins along with the origins of life human intelligence human species human development human society human current civilization along with various past civilizations of earth integrating humans their origins and their original and current conditions in an elaborate comprehensive model

vols 2 and 5 include appendices
