a study of the children living in the often harsh society of an iranian village this text presents the children as unsentimental realists who manipulate their meagre resources while learning ambiguous truths about how the world operates from their elders

carried out by the government of the shah between 1962 and 1971 the iranian land reform was one of the most ambitious such undertakings in

modern middle eastern history yet beneath apparent statistical success the actual accomplishments of the program in terms of positive benefits for the peasantry were negligible later the resulting widespread discontent of thousands of iranian villagers would contribute to the shah's downfall in the first major study of the effects of this widely publicized program eric hooglund's analysis demonstrates that the primary motives behind the land reform were political attempting to supplant the near absolute authority of the landlord class over the countryside the central government hoped to extend its own authority throughout rural iran while the pahlavi government accomplished this goal its failure to implement effective structural reform proved to be a long term liability hooglund who conducted field research in rural iran throughout the 1970s and who witnessed the unfolding of the revolution from a small village provides a careful description of the development of the land reform and of its effects on the main groups involved landlords peasants local officials merchants and brokers he shows how the continuing poverty in the countryside forced the migration of thousands of peasants to the cities resulting in serious shortages of agricultural workers and an oversupply of unskilled urban labor when the shah's government was faced with mass opposition in the cities in 1978 not only did a disillusioned rural population fail to support the regime but thousands of villagers participated in the protests that hastened the collapse of the monarchy

outside of shiraz in the fars province of southwestern iran lies aliabad mary heglund arrived in this then small agricultural village of several thousand people in the summer of 1978 unaware of the momentous changes that would sweep this town and this country in the months ahead she became the only american researcher to witness the islamic revolution firsthand over her eighteen month stay days of revolution offers an insider's view of how regular people were drawn into experienced and influenced the 1979 revolution and its aftermath conventional wisdom assumes shi'a religious

ideology fueled the revolutionary movement but hegland counters that the revolution spread through much more pragmatic concerns growing inequality lack of development and employment opportunities government corruption local expectations of leaders and the political process expectations developed from their experience with traditional kinship based factions guided local villagers attitudes and decision making and they often adopted the religious justifications for revolution only after joining the uprising sharing stories of conflict and revolution alongside in depth interviews the book sheds new light on this critical historical moment returning to aliabad decades later days of revolution closes with a view of the village and revolution thirty years on over the course of several visits between 2003 and 2008 mary hegland investigates the lasting effects of the revolution on the local political factions and in individual lives as iran remains front page news this intimate look at the country s recent history and its people has never been more timely or critical for understanding the critical interplay of local and global politics in iran
